Notice	ii
Acknowledgment	iii
Preface	iv
Figures	ix
Tables	x
Nomenclature	xiv
Conversion Factors	xxi
Chapter 1 Introduction	1-1
1.1 Background and Objective	1-1
1.2 How to Use the Handbook	1-2
1.3 References	1-5
Chapter 2 HAP Emissions by Source Category and Key Physical Properties	2-1
2.1 Background	2-1
2.2 Identification of Potential HAPs and Emission Sources	2-2
2.2.1 Solvent Usage Operations	2-3
2.2.2 Metallurgical Industries	2-4
2.2.3 Synthetic Organic Chemical Manufacturing Industry (SOCMI)	2-4
2.2.4 Inorganic Chemical Manufacturing Industry	2-7
2.2.5 Chemical Products Industry	2-7
2.2.6 Mineral Products Industry	2-7
2.2.7 Wood Products Industry	2-7
2.2.8 Petroleum Related Industries	2-7
2.2.9 Combustion Sources	2-9
2.3 Identification of Key Emission Stream Properties	2-12
2.4 References	2-14
Chapter 3 Control Device Selection	3-1
3.1 Background	3-1
3.2 Vapor Emissions Control	3-1
3.2.1 Control Techniques for Organic Vapor Emissions from Point Sources	3-1
3.2.2 Control Techniques for Inorganic Vapor Emissions from Point Sources	3-6

Contents (continued)

	Page
3.2.3 Control Techniques for Organic/ Inorganic Vapor Emissions from Process Fugitive Sources	3-7
3.2.4 Control Techniques for Organic/ Inorganic Vapor Emissions from Area Fugitive Sources	3-10
3.2.5 Control Device Selection for a Hypothetical Facility	3-10
3.3 Particulate Emissions Control	3-11
3.3.1 Control Techniques for Particulate Emissions from Point Sources	3-11
3.3.2 Control Techniques for Particulate Emissions from Fugitive Sources	3-15
3.4 References	3-23
Chapter 4 Design and Cost of HAP Control Techniques	4-1
4.1 Background	4-1
4.2 Thermal Incineration	4-1
4.2.1 Data Required	4-3
4.2.2 Pretreatment of the Emission Stream: Dilution Air Requirements	4-3
4.2.3 Design Variables, Destruction Efficiency, and Typical Operational Problems	4-3
4.2.4 Determination of Incinerator Operating Variables	4-5
4.2.5 Evaluation of Permit Application	4-6
4.2.6 Capital and Annual Costs of Thermal Incinerators	4-7
4.2.7 References	4-10
4.3 Catalytic Incineration	4-10
4.3.1 Data Required	4-11
4.3.2 Pretreatment of the Emission Stream	4-12
4.3.3 Design Variables, Destruction Efficiency, and Typical Operational Problems	4-12
4.3.4 Determination of Incinerator Operating Variables	4-14
4.3.5 Catalyst Bed Requirement	4-16
4.3.6 Evaluation of Permit Application	4-16
4.3.7 Capital and Annual Costs of Catalytic Incinerators	4-16
4.3.8 References	4-20
4.4 Flares	4-20
4.4.1 Data Required	4-20
4.4.2 Determination of Flare Operating Variables	4-21

Contents (continued)

	Page
4.4.3 Evaluation of Permit Application	4-23
4.4.4 Capital and Annual Costs of Flares	4-23
4.4.5 References	4-27
4.5 Boiler/Process Heaters	4-27
4.6 Carbon Adsorption	4-28
4.6.1 Data Required	4-28
4.6.2 Adsorption Theory	4-28
4.6.3 Design Parameters	4-29
4.6.4 Pretreatment of the Emission Stream	4-29
4.6.5 Typical Operational Characteristics, Problems, and Adsorber Types	4-30
4.6.6 Fixed Bed Regenerative Systems	4-30
4.6.7 Evaluation of Permit Application	4-34
4.6.8 Capital and Annual Costs of Fixed Bed Regenerative Adsorbers	4-34
4.6.9 Carbon Canister System Design	4-41
4.6.10 Capital and Annual Costs of Canister Systems	4-42
4.6.11 References	4-44
4.7 Absorption	4-44
4.7.1 Data Required	4-45
4.7.2 Absorption System Design Variables	4-45
4.7.3 Determination of Absorber System Design and Operating Variables	4-46
4.7.4 Evaluation of Permit Application	4-51
4.7.5 Capital and Annual Costs of Absorbers	4-52
4.7.6 References	4-54
4.8 Condensers	4-55
4.8.1 Data Required	4-56
4.8.2 Pretreatment of the Emission Stream	4-56
4.8.3 Condenser System Design Variables	4-56
4.8.4 Evaluation of Permit Application	4-59
4.8.5 Capital and Annual Costs of Condensers	4-59
4.8.6 References	4-64
4.9 Fabric Filters	4-64
4.9.1 Data Required	4-65
4.9.2 Pretreatment of the Emission Stream	4-65
4.9.3 Fabric Filter System Design Variables	4-65
4.9.4 Determination of Baghouse Operating Parameters	4-70
4.9.5 Evaluation of Permit Application	4-71
4.9.6 Capital and Annual Costs of Fabric Filters	4-71
4.9.7 References	4-79
4.10 Electrostatic Precipitators	4-80
4.10.1 Data Required	4-81

Contents (continued)

	Page
4.10.2 Pretreatment of the Emission Stream	4-81
4.10.3 ESP Design Variables	4-81
4.10.4 Evaluation of Permit Application	4-82
4.10.5 Determination of ESP Operating Parameters	4-84
4.10.6 Capital and Annual Costs of ESP Systems	4-85
4.10.7 References	4-90
4.11 Venturi Scrubbers	4-90
4.11.1 Data Required	4-91
4.11.2 Pretreatment of the Emission Stream	4-91
4.11.3 Venturi Scrubber Design Variables	4-91
4.11.4 Sizing of Venturi Scrubbers	4-93
4.11.5 Evaluation of Permit Application	4-94
4.11.6 Capital and Annual Costs of Venturi Scrubbers	4-94
4.11.7 References	4-98
4.12 Costs of Auxiliary Equipment	4-98
4.12.1 Fan Purchase Cost	4-98
4.12.2 Ductwork Purchase Cost	4-100
4.12.3 Stack Purchase Cost	4-100
4.12.4 Damper Purchase Cost	4-100
4.12.5 Cyclone Purchase Cost	4-101
4.12.6 References	4-101

Appendices

A.1 Listing of Compounds Currently Considered Hazardous	A.1-1
A.2 Toxic Air Pollutant/Source Crosswalk	A.2-1
A.3 Potential HAPs for Solvent Usage Operations	A.3-1
B.1 Gas Stream Parameters Calculations	B.1-1
B.2 Dilution Air Requirements Calculations	B.2-1
B.3 Gas Stream Conditioning Equipment	B.3-1
C.1 HAP Emission Stream Data Form	C.1-1
C.2 Calculation Sheet for Dilution Air Requirements	C.2-1
C.3 Calculation Sheet for Thermal Incineration	C.3-1
C.4 Calculation Sheet for Catalytic Incineration	C.4-1
C.5 Calculation Sheet for Flares	C.5-1
C.6 Calculation Sheet for Carbon Adsorption	C.6-1
C.7 Calculation Sheet for Absorption	C.7-1
C.8 Calculation Sheet for Condensation	C.8-1
C.9 Calculation Sheet for Fabric Filters	C.9-1
C.10 Calculation Sheet for Electrostatic Precipitators	C.10-1
C.11 Calculation Sheet for Venturi Scrubbers	C.11-1
C.12 Calculation Sheet for Auxiliary Equipment	C.12-1

Figures

Number	Page
1.1	Steps Used When Responding to Inquires 1-3
1.2	Steps Used When Reviewing Permits 1-4
2.1	HAP Emission Stream Data Form 2-2
2.2	Potential Emission Points for Vacuum Distillation Column 2-6
3.1	Approximate Percent Reduction Ranges for Add-On Equipment 3-2
3.2	Effluent Characteristics for Emission Stream #1 3-11
3.3	Effluent Characteristics for Emission Stream #2 3-12
3.4	Effluent Characteristics for Emission Stream #3 3-13
3.5	Effluent Characteristics for Emission Stream #4 3-14
3.6	Effluent Characteristics for Emission Stream #5 3-15
3.7	Effluent Characteristics for Emission Stream #6 3-17
3.8	Effluent Characteristics for Emission Stream #7 3-19
3.9	Effluent Characteristics for a Municipal Incinerator Emission Stream 3-20
4.2-1	Schematic Diagram of a Thermal Incinerator 4-2
4.3-1	Schematic Diagram of a Catalytic Incinerator System 4-11
4.4-1	Typical Steam Assisted Flare 4-21
4.6-1	Typical Two Bed Regenerative Carbon Adsorption System 4-31
4.7-1	Typical Countercurrent Packed Column Absorber 4-44
4.7-2	Flooding Correlation in Randomly Packed Towers 4-46
4.7-3	Relationship between N_{og} , AF, and Efficiency 4-48
4.7-4	Costs of Absorber Towers 4-50
4.8-1	Flow Diagram for Typical Refrigerated Condenser System 4-55
4.8-2	Vapor Pressure Temperature Relationship 4-57
4.8-3	Costs for Fixed Tubesheet Condensers 4-61
4.8-4	Costs for Floating Head Condensers 4-61
4.9-1	Structure Costs for Intermittent Shaker Filters 4-73
4.9-2	Structure Costs for Continuous Shaker Filters 4-73
4.9-3	Structure Costs for Pulse-Jet Filters (Common Housing) 4-74
4.9-4	Structure Costs for Pulse-Jet Filters (Modular) 4-74
4.9-5	Structure Costs for Reverse-Air Filters 4-75
4.9-6	Structure Costs for Custom Built Filters 4-75
4.10-1	Chart for Finding SCA 4-84
4.10-2	Cost of Plate Wire and Flat Plate ESP Structures 4-87
4.10-3	Costs of Two-Stage ESP Structures 4-88
4.11-1	Typical Venturi Scrubber Performance Curve 4-92
4.11-2	Psychrometric Chart 4-95
B.1-1	Acid Dew Points in Stack Gases B.1-3

Tables

Number		Page
2.1	Potential HAPs and Emission Sources for Solvent Usage Operations	2-3
2.2	Potential HAPs and Emission Sources for Metallurgical Industries	2-5
2.3	Emission Sources for the SOCFI	2-6
2.4	Potential HAPs for Inorganic Chemical Manufacturing Industry	2-8
2.5	Potential HAPs and Emission Sources for the Chemical Products Industry	2-10
2.6	Potential HAPs for the Mineral Products Industry	2-11
2.7	Potential HAPs for the Wood Products Industry	2-12
2.8	Potential HAPs for Petroleum Related Industries (General)	2-12
2.9	Potential HAPs for Petroleum Refining Industries (Specific)	2-13
2.10	Emission Sources for the Petroleum Related Industries	2-13
2.11	Potential HAPs and Emission Sources for Combustion Sources	2-14
2.12	Key Properties for Organic Vapor Emissions	2-15
2.13	Key Properties for Inorganic Vapor Emissions	2-15
2.14	Key Properties for Particulate Emissions	2-15
3.1	Key Emission Stream and HAP Characteristics for Selecting Control Techniques	3-2
3.2	Control Methods for Various Inorganic Vapors	3-7
3.3	Summary of Control Effectiveness for Controlling Organic Process Fugitive Emission Sources	3-8
3.4	Range of Capture Velocities	3-9
3.5	Key Characteristics for Particulate Emission Streams	3-13
3.6	Advantages and Disadvantages of Particulate Control Devices	3-18
3.7	Control Technology Applications for Transfer and Conveying Sources	3-20
3.8	Control Technology Applications for Loading and Unloading Operations	3-21
3.9	Control Technology Applications for Plant Roads	3-21
3.10	Control Technology Applications for Open Storage Piles	3-22
3.11	Control Technology Applications for Waste Disposal Sites	3-23
4.2-1	Flammability Characteristics of Combustible Organic Compounds in Air	4-4
4.2-2	Thermal Incinerator System Design Variables	4-5
4.2-3	Theoretical Combustion Temperatures Required for 99.99 Percent Destruction Efficiencies	4-5
4.2-4	Comparison of Calculated Values and Values Supplied by Applicant for Thermal Incineration	4-7
4.2-5	Costs for Thermal Incinerators	4-7

Tables (continued)

Number	Page
4.2-6	Capital Cost Factors for Thermal Incinerators 4-8
4.2-7	Example Case Capital Costs 4-9
4.2-8	Annual Cost Factors for Thermal Incinerators 4-9
4.2-9	Typical Pressure Drops for Thermal Incinerators 4-9
4.3-1	Catalytic Incinerator System Design Variables 4-13
4.3-2	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Catalytic Incineration 4-16
4.3-3	Equipment Costs for Fixed Bed Catalytic Incinerators 4-16
4.3-4	Capital Cost Factors for Catalytic Incinerators 4-17
4.3-5	Example Case Capital Costs 4-18
4.3-6	Annual Cost Factors for Catalytic Incinerators 4-19
4.3-7	Typical Pressure Drops for Catalytic Incinerators 4-19
4.4-1	Flare Gas Exit Velocities for 98 Percent Destruction Efficiency 4-22
4.4-2	Comparison of Calculated Values and Values Supplied by Permit Applicant for Flares 4-24
4.4-3	Capital Cost Factors for Flares 4-24
4.4-4	Example Case Capital Costs 4-25
4.4-5	Annual Cost Factors for Flares 4-26
4.6-1	Parameters for Selected Adsorption Isotherms 4-29
4.6-2	Carbon Adsorber System Efficiency Variables 4-33
4.6-3	Comparison of Calculated Values and Values Supplied by Permit Applicant for Carbon Adsorption 4-34
4.6-4	Multiplication Cost Factors for Materials 4-35
4.6-5	Installation Factors for Fixed Bed Carbon Adsorbers 4-35
4.6-6	Example Case Capital Costs 4-36
4.6-7	Unit Cost Factors for Carbon Adsorption Annual Costs 4-37
4.6-8	Selected Equations for Carbon Adsorption Annual Cost Estimate 4-38
4.6-9	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Carbon Canister Systems 4-42
4.6-10	Equipment Costs for Canister Units 4-42
4.7-1	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Absorption 4-50
4.7-2	Cost of Packing Materials 4-50
4.7-3	Capital Cost Factors for Absorbers 4-51
4.7-4	Example Case Capital Costs 4-52
4.7-5	Annual Cost Factors for Absorber Systems 4-54
4.8-1	Coolant Selection 4-56
4.8-2	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Condensation 4-60
4.8-3	Capital Cost Factors for Condensers 4-60
4.8-4	Capital Costs for Refrigerant Systems 4-62
4.8-5	Example Case Capital Costs 4-63
4.8-6	Annual Cost Factors for Condenser Systems 4-64
4.9-1	Characteristics of Several Fibers Used in Fabric Filtration 4-67
4.9-2	Comparison of Fabric Filter Bag Cleaning Methods 4-67
4.9-3	Air-to-Cloth Ratios 4-69
4.9-4	Factors to Obtain Gross Cloth Area from Net Cloth Area 4-69
4.9-5	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Fabric Filters 4-69

Tables (continued)

Number

4.9-6	Guide to Estimate Costs of Bare Fabric Filter Systems	4-72
4.9-7	Bag Prices	4-76
4.9-8	Capital Cost Factors for Fabric Filters	4-77
4.9-9	Example Case Capital Costs	4-78
4.9-10	Annual Costs for Fabric Filters	4-78
4.10-1	Plate-Wire ESP Drift Velocities	4-83
4.10-2	Wet Plate-Wire ESP Drift Velocities	4-83
4.10-3	Flat Plate ESP Drift Velocities	4-83
4.10-4	Comparison of Calculated Values and Values Supplied by the Permit Applicant for ESPs	4-84
4.10-5	Capital Cost Factors for ESPs	4-85
4.10-6	Equipment Cost Multipliers for ESP Optional Equipment	4-85
4.10-7	Equipment Cost Multipliers for Various Materials of Construction	4-86
4.10-8	Example Case Capital Costs	4-89
4.10-9	Annual Costs for ESPs	4-89
4.11-1	Pressure Drops for Typical Venturi Scrubber Applications	4-93
4.11-2	Construction Materials for Typical Venturi Scrubber Applications	4-94
4.11-3	Comparison of Calculated Values and Values Supplied by the Applicant for Venturi Scrubbers	4-95
4.11-4	Venturi Scrubber Equipment Costs	4-95
4.11-5	Capital Cost Factors for Venturi Scrubbers	4-96
4.11-6	Example Case Capital Costs	4-96
4.11-7	Annual Cost Factors for Venturi Scrubbers	4-97
4.12-1	CE Equipment Index	4-99
4.12-2	Equation 4.12-3 Parameters	4-99
4.12-3	Parameters for Costs of Large Stacks	4-100
B.1-1	Dew Point Temperature (°F)	B.1-2
B.1-2	Heats of Combustion and Lower Explosive Limit (LEL) Data for Selected Compounds	B.1-4
B.1-3	Properties of Selected Organic Compounds	B.1-4
4.2-4	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Thermal Incineration	C.3-4
4.3-2	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Catalytic Incineration	C.4-5
4.4-2	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Flares	C.5-3
4.6-3	Comparison of Calculated Values and Values Supplied by Permit Applicant for Carbon Adsorption	C.6-5
4.6-9	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Carbon Canister Systems	C.6-10
4.7-1	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Absorption	C.7-7
C.7-1	Constants for Use in Determining Height of a Gas Film Transfer Unit	C.7-10
C.7-2	Constants for Use in Determining Height of a Liquid Film Transfer Unit	C.7-11
C.7-3	Schmidt Numbers for Gases and Vapors in Air at 77° and 1 ATM	C.7-12

Tables (continued)

Number		Page
C.7-4	Schmidt Numbers for Compounds in Water at 68°F	C.7-13
C.7-5	Pressure Drop Constants for Tower Packing	C.7-14
C.8-1	Average Specific Heats of Vapors	C.8-4
4.8-2	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Condensation	C.8-6
4.9-5	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Fabric Filters	C-9.4
4.10-4	Comparison of Calculated Values and Values Supplied by the Permit Applicant for ESPs	C.10-2
4.11-3	Comparison of Calculated Values and Values Supplied by the Permit Applicant for Venturi Scrubbers	C.11-3
